6,150 → 1,750

U.S. metalcasting plants since 1955. The heat treaters and inspection labs that serve them close in turn: at least twelve commercial heat treaters shut in one year, and 2025 set a closure record.

WolfMind Industries researches and develops engineering systems and software that make aerospace-grade manufacturing verifiable and affordable for suppliers of every size: zero-trust provenance for quality records, low-cost radiographic inspection, and pyrometry compliance software.

CORE COMPETENCIES

- **Engineering research and development.** Aperture radiographic imaging system, a scintillator-camera X-ray inspection chain. Real-time images of production aluminum castings, April 2026.
- **Zero-trust provenance.** Signed, externally witnessed, tamper-evident quality records (digital objective quality evidence, certificates of conformance) that any recipient verifies from the record alone.
- **Software publishing and custom programming.** PyroMesh pyrometry data acquisition for AMS 2750: sensor firmware, MQTT messaging, Elixir/OTP services, hash-chained records.
- **Computer systems design.** Secure distributed systems: PKI, mTLS, FIDO2/PIV hardware-key signing, Microsoft GCC High.
- **Technical consulting.** Aerospace special processes: AMS 2750 pyrometry, Nadcap audit preparation, heat treat and NDT specifications.

DIFFERENTIATORS

- **3rd generation aerospace.** Founded from inside the industry it serves. The family has done radiography in Fort Worth since the 1950s.
- **$1,900 imaging chain.** Validated April 2026. Turnkey real-time X-ray systems cost $150,000 to $300,000.
- **Verifiable by anyone.** Records check against the producer's published keys, with no access to the producer's systems and no vendor lock-in.
- **Fielded standards.** OpenID Connect, JSON Web Tokens, SHA-256, Ed25519 and FIDO2/PIV. No new cryptography and no proprietary formats.

CORPORATE DATA

NAICS:	541715 (primary), 541511, 541512, 513210, 541690
CAGE:	1QT90
UEI:	QZKLH6NJ6ET7
Registrations:	SAM.gov active, SBIR.gov, DSIP
Socioeconomic:	Small Business, Self-Certified SDB
Environment:	Microsoft 365 GCC High
Location:	Fort Worth, TX
Formed:	January 2026

EXPERIENCE

Justin Baker, Founder and CEO

- **Centex Lab, Haltom City, TX.** Former CEO of the family's Nadcap-accredited heat treat, fluorescent penetrant and film radiography lab, and still coordinates its Nadcap audits. Programs served under approved-supplier purchase orders: F-35, F-16, Bell, Sikorsky, Gulfstream, Honeywell, Collins Aerospace, and Hartzell's U.S. Army aviation propellers.
- **Artemis Intelligence.** Senior Software Architect. Built production PKI and mTLS, and an ML inference pipeline scaled to about 90 machines.
- **Open source.** Created WebSockex, an Elixir library with over 5 million downloads. Past maintainer of RubyInstaller, the standard Ruby distribution for Windows.
